Hearthacker124@gmail.com

Q1. Computers are good at:
Select correct option:

Speed
Storage
Never bored
All of the given choices

Q2. Grace Hopper of US Navy develops the very first_____ compiler
Select correct option:

Low-level Language
High-level language
Both high and low level language
None of the given choices

2.5 Harvard Mark 1 – 1943:
Howard Aiken and Grace Hopper designed the MARK series of computers at Harvard University. The MARK series of computers began with the Mark I in 1944. Imagine a giant roomful of noisy, clicking metal parts, 55 feet long and 8 feet high. The 5-ton device contained almost 760,000 separate pieces. Used by the US Navy for gunnery andballistic calculations, the Mark I was in operation until 1959. The computer, controlled by pre-punched paper tape, could carry out addition, subtraction, multiplication, division and reference to previous results. It had special
subroutines for logarithms and trigonometric functions and used 23 decimal place numbers. Data was stored andcounted mechanically using 3000 decimal storage wheels, 1400 rotary dial switches, and 500 miles of wire. Its electromagnetic relays classified the machine as a relay computer. All output was displayed on an electric typewriter. By today's standards, the Mark I was slow, requiring 3-5 seconds for a multiplication operation

(p14
Q3.The first Web browser with a GUI was generally available in:
Select correct option:

1992
1993
1994
1995
The first Web browser with a graphical user interface was generally available (Mosaic, in 1993), the term seemed to apply to Web content, too. Technically, a Web browser is a client program that uses the Hypertext Transfer Protocol (HTTP) to make requests of Web servers throughout the Internet on behalf of the browser user.(18

Q4. If a computer could pass the Turing test then it would be able to:
Select correct option:

win a million dollar prize
think like human begins

think but slower than humans
do the things faster
2.2 The "Turing test"
A test proposed to determine if a computer has the ability to think. In 1950, Alan Turing (Turing, 1950) proposed a method for determining if machines can think. This method is known as The Turing Test. (13
Q5.The name of programming language, specifically designed by the US Department of Defense for developing military applications, was:
Select correct option:

Smalltalk
C
C++
Ada
Ada: A programming language specifically designed by the US Dept of Defense for developing military applications was named Ada to honor her contributions towards computing(p9
Q6.TCP Stands for:
Select correct option:

Transmission Control Principles
Transmission Control Protocol
Transformation Control Protocol
Translation Control Protocol
Communications on the Internet is controlled by a set of two protocols: TCP and IP TCP/IP Transmission Control Protocol/Internet Protocol Networking protocol used by all computers and networks on the Internet Originally developed by the US DoD for Unix, but now available for most other OSes TCP breaks down the message to be sent over the Internet into packets IP routes

these packets through the Internet to get them to their destination When the packets reach the destination computer, TCP reassembles them into the original message (p196
Q7.Web is a unique invention by humans in terms that it is:
Select correct option:

accessible to all humans
accessible to only the owners who control it
accessible to particular locations only
None of the given choices

Q8.The name of first commercially available PC was:
Select correct option:

UNIVAC 1
ENIAC
EDVAC
Altair 8800
2.9 UNIVAC 1 – 1951
UNIVAC-1. The first commercially successful electronic computer, UNIVAC I, was also the first general purpose computer - designed to handle both numeric and textual information. It was designed by J. Presper Eckert and John Mauchly. The implementation of this machine marked the real beginning of the computer era.(P14

Q9. A strategy in which all possible combinations are examined and best one is selected called……
Select correct option:

Divide and conquer
Brute force
Heuristic
All of given
16.12 The Brute Force Strategy (1)
A strategy in which all possible combinations are examined and the best among them is Selected (p103

Q10.Super Computers are used in:
Select correct option:

Weather forecasting
Aeroplane manufacturing
Atomic Bomb experiments
All of the given choices

Q11.ENIAC was first_____ Computer
Select correct option:

Large-scale

General-purpose
Electronic
All of the given choices
2.6 ENIAC – 1946:
ENIAC I (Electrical Numerical Integrator And Calculator). The U.S. military sponsored their research; they needed a calculating device for writing artillery-firing tables (the settings used for different weapons under varied conditions for target accuracy).(p14)
Q12.Which one of the following units can be called as the brain of computer microprocessor?
Select correct option:
ALU (Arithmetic & Logic Unit)
FPU (Floating Point Unit)
Control Unit
Bus Interface Unit
A control unit is the part of a CPU or other device that directs its operation. The outputs of the unit control the activity of the rest of the device. A control unit can be thought of as a finite state machine. It is called the brain of computer microprcessor. (p36
Q13.Which one of the following is a really fast port that lets you connect computer peripherals and consumer electronics to your computer without the need to restart?
Select correct option:
Freeware
Shareware
Fire wire
Firmware
FireWire is simply a really fast port that lets you connect computer peripherals and consumer electronics to your computer without the need to restart. It is a simple common plug-in serial connector on the back of your computer. It has the ability to chain devices together in a number of different ways without terminators for example, simply join 2 computers with a FireWire cable for instant high-speed networking.(P24)

Q14.The name of programming language, specifically designed by the US Department of Defense for developing military applications, was:
Select correct option:
Smalltalk
C
C++
Ada
Ada: A programming language specifically designed by the US Dept of Defense for developing military applications was named Ada to honor her contributions towards computing(p9
Q15 Which one of these is NOT an example of storage devices?
Select correct option:
CD
Floppy
Hard Disk
Q16 Which category of computers lies between Workstation and Mainframe computers?
Select correct option:

Microcomputer
Desktop
Laptop
Minicomputer
4.4 Servers / Minicomputers A midsized computer. In size and power, minicomputers lie between workstations and mainframes. In the past decade, the distinction between large minicomputers and small mainframes has blurred, however, as has the distinction between small minicomputers and workstations. But in general, a minicomputer is a multiprocessing system capable of supporting from 4 to about 200 users simultaneously.(21

Q17 Algorithm is a precise sequence of a limited number of _____ , _____steps that terminates in the form of a solution
Select correct option:
Ambiguous, Executable
Nondeterministic, Finite
Finite, countable
Unambiguous, executable
Ref
1st Definition:
Sequence of steps that is taken to solve a problem
Better Definition:
A precise sequence of a limited number of unambiguous, executable steps that terminates in the form of a solution
Q18 Which one of the following web programming languages used to do client-side scripting?
Select correct option:
ASP
Server Side JavaScript
PHP
VBScript
We'll use JavaScript to do client-side scripting. However, there are many other languages p119

Q19 This principle called the "Ockham's Razor," states when choosing among competing, successful solutions to a problem; choose the one which is the least _____
Select correct option:
Time Consuming
Ambiguous
Complex
Selecting Among Algorithms
When choosing among competing, successful solutions to a problem, choose the one which is the least
complex This principle is called the "Ockham's Razor," after William of Ockham - famous 13-th century English philosopher(101
Q20 _____ software sits on top of _____ software for performing user tasks.
Select correct option:
System, Application
System, Productivity

Application, System
System, Programming
Q21 Deep Blue was the name of:
Select correct option:
Human
Computer
City
None of the given choices
In 1997 Deep Blue, a supercomputer designed by IBM, beat Gary Kasparov, the World Chess Champion That computer was exceptionally fast, did not get tired or bored. It just kept on analyzing the situation and kept on searching until it found the perfect move from its list of possible moves (P9)
Q22 Linux and Mac are examples of :
Select correct option:
Uni processor OS
Multi processor OS

Q23 Given the HTML code, <A HREF="mailto: ahsan@vu.edu.pk"> ahsan@vu.edu.pk</A> My email. Read the code carefully and tell what out put browser will generate?
Select correct option:
ahsan@vu.edu.pk
ahasn@vu.edu.pk
My email ahasn@vu.edu.pk
None of the given choices
ref: right answer will be
ahsan@vu.edu.pk My email.

paste following code in any html file and view in browser

```
<html>
<body>
<A HREF="mailto: ahsan@vu.edu.pk"> ahsan@vu.edu.pk</A> My email.
</body>
</html>
```

Q24 There is a battery on the mother board to:
Select correct option:
give power to the processor
Save information when computer is OFF
Help the boot process
Save information when computer is ON
ROM
ROM is "built-in" computer memory containing data that normally can only be read, not written to. ROM contains the programming that allows your computer to be "booted up" or regenerated each time you turn it on. Unlike a computer's random access memory (RAM), the data in ROM is not lost when the computer power is turned off.
The ROM is sustained by a small long-life battery in your computer.

Q25 Alan Turing of Cambridge University presented his idea of a theoretically simplified but fully capable computer, now known as:
Select correct option:

Analytical Engine
Turing Machine
Difference Engine
None of the given choices
Q26 _ is the example of a Web browser
Select correct option:

Yahoo
Netscape Navigator
Web Application
Google

Q27 The Analytical Engine was machine of which type?
Select correct option:

Programmable
Mechanical
Digital
All of the given choices
1.2. The Analytical Engine A programmable, mechanical, digital machine Could carryout any calculation Could make decisions based upon the results of the previous calculation Components: input; memory; processor; output(p 9)

Q28 Interactive Forms are always placed between:
Select correct option:

Body tags of a Web page
Head tags of a Webpage

Q29 Which interface on computer supports transmission of multiple bits at the same time?
Select correct option:

Serial Port
Parallel Port
PS/2 Port
Universal Serial Bus
Parallel
An interface on a computer that supports transmission of multiple bits at the same time; almost exclusively used for connecting a printer. On IBM or compatible computers, the parallel port uses a 25-pin connector.p24

Q30 If we want to show numbers with List Items, then we use
Select correct option:

<UL>
<OL>
<DL>
none of the given
Q31 **Trialware Softwares are used for**
Select correct option:

short period
long period
life time
none of the given
Software that can be run for a limited period of time before it is purchased. Trialware has a built-in expiration date and will cease to operate beyond that date if it has not been paid for. Also called "demoware.(http://encyclopedia2.thefreedictionary.com/trialware)
Q32 Babbage's Analytical Engine could store information permanently in:
Select correct option:

Magnetic Tape
Floppy Disk
Punched Cards
None of the given choices

Q33 First computer that could not only manipulate numbers but also text data as well was:
Select correct option:

ENIAC
EDVAC
UNIVAC 1
Attanasoff-Berry Computer
ENIAC I (Electrical Numerical Integrator And Calculator). The U.S. military sponsored their research; they needed a calculating device for writing artillery-firing tables (the settings used for different weapons under varied conditions for target accuracy). John Mauchly was the chief consultant and J Presper Eckert was the chief engineer.
Eckert was a graduate student studying at the Moore School when he met John Mauchly in 1943. It took the team about one year to design the ENIAC and 18 months and 500,000 tax dollars to build it. The ENIAC contained 17,468 vacuum tubes, along with 70,000 resistors and 10,000 Capacitors.
Q34 Greedy algorithms are usually faster, since they don't consider the details of possible alternatives
Select correct option:

True
False

KEY ADVANTAGE: Greedy algorithms are usually faster, since they don't consider the details of possible alternatives (P102

Q35 SCSI stands for:
Select correct option:

Small Computer System Interface
System Common Small Integration
Silicon Computer System Interface
None of the given choices
SCSI
A port that's faster than the serial and parallel ports but slower and harder to configure than the newer USB port. Also know as the Small Computer System Interface.(24

Q36 Greedy algorithm does not support…….. Situation.
Select correct option:

Local
Global
Complex
All of given

Q37 Which of the followings is not a Flowchart Element?
Select correct option:

Off- frame connector
Input or output
Process
Connector
flowchart elements
Start or stop
Process
Input or output
Connector
Decision
Flow line
Off-page connector
these are all the elements of flow chart so?

Q38 During one of the international cricket tournaments, one of the teams intentionally lost a match, so that they could qualify for the next round If they had won that particular match, some other team would have qualified This is an example of a _____
Greedy algorithm
Non-greedy algorithm

Q39 Teraflop stands for:
Select correct option:

Thousand floating point operations per second
Thousand floating point operations per hour
Trillion floating point operations per second

A_____ is the process of analyzing large databases to identify patterns

- Data Mining
- Data Normalization
- Data Redundancy
- Data Manipulation

onFocus executes the specified JavaScript code when _____

- a window receives focus
- a form element receives input focus
- a window receives focus or when a form element receives input focus
- None of the Given.

CERN releases WWW in:
1992
1993
1994
None of the given choices

Communications on the internet is controlled by a set of two protocols, named :

- HTTP & SMTP
- FTP & TELNET
- TCP & IP

None of the given choices

One of the disadvantages of working at home is_____

Family life may be happier because of living at home.

Family life may suffer as well, as some never turn off, and keep on working through out the day, evening and night

Family life may become happier because he can give more time to his family.

There is no disadvantage of working at home.

The greatest, shared resource of information created by humankind is:

Web

Dictionary

Vocabulary

Glossary

http://groups.google.com/group/vuZs

There are _____ types communication channels.

2

3

4

5

The Cyberwarefare is a _____

Crime

War

Software

Game

In the statement "PopUp("Message")" :

"PopUp" is the function Name, "Message" is the argument

"Message" is function identifier

Syntax Error: functions cannot be called in this way

Error: function is undefined

RGB scheme stands for _____.

Red Grey Blue

Red Green Brown

Red Green Blue

Red Green Black

_____ is the part of the virus that generally consists of malicious computer instructions

Off load

Payload

Loader

Transmitter

Unlike viruses, _____ are stand-alone programs

Trojan horses
Logic- or time-bombs
Worms
None of the given

Voice over IP has _____ modes

2
3
4
5

We use _____ to stop Break-Ins.
Scanners
Intrusion detectors
Firewalls
Intrusion detectors and Firewalls

Which one can lead user to leave your website?
Simple design
Poor navigation
Information layout
Adaptable design

_____ are the subcategories of AI
Expert Systems
Robotics
Natural Language Processing
All of the above

With the Help of FTP we can:

List, change, create folders on a remote computer
Upload and download files
Transferring Web content from the developer's PC to the Web server
All of the given choices

Which protocol is used for receiving E-mail messages?
FTP
POP
Telnet Protocol
SMTP

The organizations are learning that business can be done in a more effective manner if emphasis is placed upon _____.
Cooperation
Shared responsibility
Networking

All of the given

___ is used to transfer files between computers on a TCP/IP network
FTP
POP
Telnet Protocol
SMTP

http://groups.google.com/group/vuZs
Which of the following is True about “pareseFloat(String)” function: I) If the first character cannot be converted to a number, parseFloat returns NaN. II) it returns the fractional portion of floating point number. III) Parses the string argument; returns a FP number. IV) Non of given options.
I and II Only
II and III Only
I and III Only
IV Only

Event-driven programs can _____ events.
capture
respond
capture and respond
None of the Given.

Which of the statements is NOT true about “Color Usage Guidelines” for developing a presentation?
Use color sparingly to to highlight a point, but don't get carried away
Do not use colors like yellow or red for background except where needed.
Do not use colors like green, blue and such like colors except where needed.
None of given options

_____ Type of databases management systems are supporting Terabytes of Data
Personal
Desktop
Enterprise
Single-user

Because of the ever-decreasing costs of verbal, text, video communications; the distances have _____
Increased
Expanded
Contracted
Lengthened

The structure of the networked organization is _____.
Simple
Flexible
Complex
All of the given

A CAD drawing consist of many geometric shapes like straight lines , arc , tc and therefore is stored in a _____ format.

- Scalar
- Vector
- Both a & b

____ is a type of computer-to-computer messaging.

- TCP
- Telnet
- E-mail
- FTP
- None of these

RDBMS stands for _____

- Relative Data Base Management System
- Relational Data Base Management System
- Recursive Data Base Management System
- Responsible Data Base Management System

Using Color Mapping scheme only a limited number of color called _____ are allowed.

- Reserved
- Pointers
- Platelet
- None of these

Using _____ topology, adding new nodes is difficult.

- Ring
- Bus
- Star
- None of the given choices

Problems with old presentation methods was (transparencies and projectors etc):

- They were costly
- Electronic transmission, in some cases, was not easy
- Presentation some times gets ambiguous
- All of given options

ARPANET splits into two nets to keep military & non-military network sites separate, named :

- ARPANET & MILNET
- MICRONET & MILNET
- PICONET & ARPANET
- None of the given choices

Arguments values are passed to the function _____

- by value
- by reference

Both a & b
Non of the Given.

_____ is a field that uniquely identifies each record stored in a table.
Primary Key
Foreign Key
Secondary key
Special Key

The IP address consists of _____ bits
64
32
16
128

Credit Card Fraud can be minimized by using _____
single credit card numbers
multiple-use credit card numbers
single-use credit card numbers
Firewalls

hotWeather = (Temperature == 40); in the above statement, the variable hotWeather is of type
Number
String
Boolean
None of the given

Ref:

you are evaluating a condition (temperature ==40) and result of this condition is getting stored in HotWeather variable. which is boolean in form

Output of evaluation of condition is in the form of true or false which is a boolean value

Here I Try to key few lines to help you to see live (copy paste these in any test.htm) and run in broswer

```
<html>
<head>
<script type="text/javascript">
function show_alert()
{
Temperature = 40;
HotWeather = (Temperature == 40);
alert(HotWeather);
}
</script>
```

```
</head>
<body>

<input type="button" onclick="show_alert()" value="Show alert box" />

</body>
</html>
```

NCSA stands for :

- NationalCenter for Supercomputing Applications
- NationalCenter for Supreme Applications
- NationalCenter for Super Authority
- None of the given choices

Self-replicating SW that eludes detection and is designed to attach itself to other files is called _____.

- Trojans
- Viruses
- Sniffers
- Operating System

SVG stands for _____.

- Structured Vector Graphics
- Software Vector Graphics
- Structured Visual Graphics
- None of these

Viruses move from one computer to another with the _____ and spring into action when the _____ is executed or opened

- Host – Host
- Host – Client
- Client – Host
- Client – Client

http://groups.google.com/group/vuZs

_____ is a layered structure consisting of a number of homogenous and simple processing elements.

- Genetic Algorithms
- Rule-based Systems
- Feed-Forward Network
- None of these

A property that gives the value of Pi is:

- PI()
- Graph.PI
- Math.PI
- Math.PI()

The smallest image forming element on a computer display is called _____.

Resolution
Pixel
Grey area
None of these

SMTP stands for _____.
Simple Mail Transfer Protocol
Simple Mail Transparent Protocol
Simple Mail Transfer Paradigm
None of these

_____ network allows data to be sent directly from one computer to another.
Ring
Bus
Star
None of the given choices

Viruses attach themselves to other computer programs or data files, are known as____
Trojans
Guests
Hosts
Spies

Avoid _____ to ensure readability of web page
Overuse of bold and italics
Use of paragraphs
Use of white space
Use of contrast colors

STP stands for :
Shielded Twisted Pair
Silver Twisted Pair
Single Twisted Pair
None of the given choices

In _____, the spies of one business monitors the network traffic of their competitors.
Industrial intelligence
Industrial Espionage
Industrial spying
Industrial surveillance

Color mapping scheme reducing the size of 2.25 MB graphic to _____ MB.
0.90 MB
0.75 MB
1.00 MB
None of these

The functions which call themselves from their (own) body are called:

Virtual functions
Abstract functions
Overriding functions
Recursive functions

Browser sends '_____' request to web server to access a file.

SET
GET
TRANSFER
All of the given choices

vuzs

The internet communities are _____.

Geographical based
Interest based
Country based
Religion based

Infection propagation and Actual destructive are the components of _____

Transmission mechanism
Payload
Worms
Trojan Horse

An algorithm that always takes the best immediate or local solution while finding an answer is called____.

- Deterministic Algorithm
- Non deterministic Algorithm
- Greedy Algorithm
- Randomized Algorithm

Which of the following command allows you to recover form mistakes in MS Word?

- Clear
- Edit
- Undo
- Break

A _____ operating system allows many users to take advantage of the computer's resources, simultaneously

- Single user

► Multi- user
► Single tasking
► Multi tasking

Network Interface Card is an _____ device
► Input
► Output
► Input/Output
► Storage

The decimal equivalent of binary 1000 is
► 7
► 8
► 9
► 10
http://groups.google.com/group/vuZs

Which of the following is NOT RDBMS software?

► My Sql
► MS Excel
► Oracle
► SQL Server

A computer virus is a
► Software that saves the computer from being damaged.
► Application software that helps to make different type of viruses and worms
► Program that spreads itself and destroys other program
► Program that corrects the problems in your computer

What will be the result of a?

a = Math.abs(-23)

► 23
► -23
► 23.0
► 2.3
http://groups.google.com/group/vuZs

A Special program required to view swf (Shockwave Flash) files in web Browser is called

- TFlash
- Vflash
- plug-in
- None of the given options

Using Java Script you can write a character at random location on screen

- By applying randomCh() method
- With the help of String object
- With the help of random character property
- There is no built in approach in Java Script

If incorrectly we enter the negative age it is check by

- Limit Integrity
- Type Integrity
- Referential Integrity
- Physical Integrity

Which protocol is use to transfer a file over the network?

- UDP
- FTP
- TCP
- OSI

One can send an email message to a remote computer using _____ protocol

- HTTP
- SMTP
- FTP
- TELNET

http://groups.google.com/group/vuZs

In a System having many parts to be designed, one should always do the _____ first

► Hard part
► Simple part
► Development part
► Quality part

Flow control constructs in JavaScript includes:

► If-Else
► Loops and If -Else
► Switch and If-Else
► All of the given choices

___ provides a simple, consistent way for applications to interact with the HW without having to know all the details of the HW

► Explorer.exe
► System Files
► Operating System
► Application Software

Machine language is also called

► Assembly Language
► Binary Language
► High Level Language
► HTML Language

_____ is the best known builder for supercomputers.

► Sun
► Cray Research
► Microsoft
► Apple

http://groups.google.com/group/vuZs

The weaknesses of the computer are:

► Pattern recognition & Storage

► Speed & Innovative ideas

► Pattern recognition & Innovative ideas
► Speed & Storage

Communication protocol is a _____that governs the flow of information over a network

► Set of methods
► Set of protocols
► Set of rules
► Device

_____ team is responsible for the maintenance, expansion , improvement of the infrastructure consisting of workstations, networking equipment, software and network security.

► Support
► Configuration Management
► Quality Assurance
► Developer

http://groups.google.com/group/vuZs

_____ team consists on the sharpest technical minds in the company.

► Architecture
► Business Development
► Configuration Management
► Developer

_____ is responsible for day to day operations.

► CEO
► COO
► CMSO
► Developer

http://groups.google.com/group/vuZs

One of the key responsibilities of the _____ is client relationship management.

► Project Manager
► Team Lead
► Developer
► Quality Assurance Engineer

What is the major problem with flash based website?

- ► Its two heavy
- ► Cannot be indexed
- ► Less attractive
- ► Inaccessible

Which of the following is NOT an event handler for image object?

- ► onAbort
- ► onError
- ► onLoad
- ► onUser

The organizations are learning that business can be done in a more effective manner if emphasis is placed upon _____.

- ► Cooperation
- ► Shared responsibility
- ► Networking
- ► All of the given options

a = Math.abs(-23)

What will be the value of a ?

- ► 23
- ► -23
- ► 23.0
- ► 2.3

ERP is a type of _____ .

- ► Entertainment software
- ► Productivity software
- ► Business software
- ► Scientific software

In Genetic Algorithm the most important thing you should know, is the _____.

- ▶ Procedure
- ▶ Recognition of a good solution
- ▶ Different techniques
- ▶ None of the given options

According to a popular heuristic, success is defined by _____.

- ▶ The user
- ▶ The builder
- ▶ Both user and builder
- ▶ None of the given options

http://groups.google.com/group/vuZs

Rule of thumb learned through trial and error is called _____.

- ▶ Design
- ▶ Heuristic
- ▶ Plan
- ▶ Aim

JavaScript Variables are _____.

- ▶ Dynamically Typed
- ▶ Statically Typed
- ▶ Strong Typed
- ▶ None of the given options

Which of the following application are collections of cells?

- ▶ Word
- ▶ Excel
- ▶ PowerPoint
- ▶ Outlook Express

http://groups.google.com/group/vuZs

The browser breaks down the URL into _____ parts.

- ▶ 2
- ▶ 3
- ▶ 4

► 5

A named collection of properties (data, state) and methods (instruction, behavior) is called _____.

► Array
► Function
► Variable
► Object

First computer network was _____.

► NSFNET
► FIRSTNET
► ARPANET
► ORPHANET

In JavaScript, a variable declaration is

► Optional
► Mandatory
► Not allowed
► None of the given

A protocol used for receiving email messages is called _____.

► URL
► Telnet
► POP3
► SMTP

which one is correct?

► onUnload

► onUnLoad

► onUNLOAD

► All of the above

Serial arrangement in which things follow logical order or a recurrent pattern, such as statements executing one by one, is called _____.

► Loop
► Sequence
► Condition
► Array

Variables allow us to manipulate data through the _____.

► Actual Value
► Reference
► Length
► Name

Fuzzy logic is based on _____.

► Ground facts
► Experience
► Practice
► Approximation

http://groups.google.com/group/vuZs

Word Processor is a _____

► System Software
► Application Software
► Device
► Utility

In the old days, databases did NOT support _____.

http://groups.google.com/group/vuZs

► Number
► Boolean
► Video
► Text

In tabular storage, fields placed in a particular row are strongly _____.

► Independent

► Dependent
► Interrelated
► Inconsistent

Due to working at home, lack of interaction may result in _____ professional growth.

► Slower
► Faster
► Higher
► Improved

Distance learning has got a boost due to the _____.
► Easy communication
► Online interactive contents
► Flexibility
► All of the given options

_____ technique can be used to create smooth animations or to display one of several images based on the requirement.

► Image downloading
► Image preloading
► Image uploading
► Image postloading

The _____ is becoming the preferred organizational structure for more and more organizations with the passage of time.

► Tree structured organizational model
► Network paradigm
► Hierarchical structure
► None of the given options

The group of technologies concerned with the capturing, processing and transmission of information in the digital electronic form is called

_____.

► Telecom Engineering
► Computer Engineering
► Computer Science
► Information Technology

A large number of networks interconnected physically is called _____

► LAN
► MAN
► Internet
► Network collection

TCP stands for _____.

► Transfer Center protocol
► Transmission Control Protocol
► Transmission Center Protocol
► Telephone Center Protocol

A collection of data organized in such a way that the computer can quickly search for a desired data item is known as :
► Retrieving
► Database
► Information
► DBMS
http://groups.google.com/group/vuZs

_____ is simply a fast port that lets you connect computer peripherals and consumer electronics to your computer without restart.

► Freeware
► Shareware
► Firewire
► Firmware

Structures, in which another list starts before the first list is finished, are called:

► Multiple Lists
► Nested Lists
► Ordered Lists
► Un-ordered Lists
http://groups.google.com/group/vuZs

The key property of the 'Array' object in JavaScript is

► Value
► Length
► Name
► All of the given choices

Which one is the example of spreadsheet software ?

► MS Word
► MS PowerPoint
► MS Excel
► MS Access

The Encryption of data is related to

► Data updates
► Data security
► Data integrity
► Data accessibility

_____ is the process of analyzing large databases to identify patterns.

► Data normalization
► Data management
► Data Mining
► None of the given options

Which is the user-friendly way of presenting data ?

► Query
► Form
► Report
► All of the given options

<form> Tags always placed between the <BODY> and </BODY> tags of a Web page

► True
► False

Java script has ---------- ability to create and draw graphics.

► Limited
► Versatile
► Medium
► Not at all

Which of the following is incorrect for making design elements legible?

Select correct option:

Elements should be large enough

Elements must contrast sufficiently

Related elements should be visually grouped

Elements should have no visual focus

Function is also known as _____.

Select correct option:

subprogram

procedure

subroutine

All of given

In _____ TCP\IP protocols became the only set of protocols used on the ARPANET.

Select correct option:

1973

1983

1972

None of the given choices

E-mail system has _____ component(s)

Select correct option:

E-mail client

SMTP server

POP3 server

All of the given choices

_____ / / /_____/ A Parallelogram (Tilted rectangle) represents the _____ flow chart element.

Select correct option:

Process

Input or Output

Decision

Connector

If a computer could pass the Turing test then it would be able to:

Select correct option:

http://groups.google.com/group/vuZs

win a million dollar prize

think like human begins

think but slower than humans

do the things faster

Punched cards were replaced by:

Select correct option:

Floppy Disk

Zip Drives

Magnetic storage

None of the given choices

vuzs

The _____virus may display an annoying, but harmless message

Select correct option:

Malicious

Neutral

Helpful

DoS

The name of very first computer was:

Select correct option:

ABC

BCD

EDC

None of the given choices

The internet communities are _____.

Select correct option:

Geographical based

Interest based

Country based

Religion based

which one is correct?

► onUnload

► onUnLoad

► onUNLOAD

► All of the above

Serial arrangement in which things follow logical order or a recurrent pattern, such as statements executing one by one, is called _____.

► Loop
► Sequence
► Condition
► Array

Variables allow us to manipulate data through the _____.

► Actual Value
► Reference
► Length
► Name

Fuzzy logic is based on _____.

► Ground facts
► Experience
► Practice
► Approximation

Word Processor is a _____

► System Software
► Application Software
► Device
► Utility

In the old days, databases did NOT support _____.

► Number
► Boolean
► Video
► Text

In tabular storage, fields placed in a particular row are strongly _____.

► Independent
► Dependent
► Interrelated
► Inconsistent

Due to working at home, lack of interaction may result in _____ professional growth.

► Slower
► Faster
► Higher
► Improved

Distance learning has got a boost due to the _____.
► Easy communication
► Online interactive contents
► Flexibility
► All of the given options

_____ technique can be used to create smooth animations or to display one of several images based on the requirement.

► Image downloading
► Image preloading
► Image uploading
► Image postloading

The _____ is becoming the preferred organizational structure for more and more organizations with the passage of time.

► Tree structured organizational model
► Network paradigm
► Hierarchical structure
► None of the given options

The group of technologies concerned with the capturing, processing and transmission of information in the digital electronic form is called

_____.

► Telecom Engineering
► Computer Engineering
► Computer Science
► Information Technology

A large number of networks interconnected physically is called _____

► LAN
► MAN
► Internet
► Network collection

TCP stands for _____.

► Transfer Center protocol
► Transmission Control Protocol
► Transmission Center Protocol
► Telephone Center Protocol

A collection of data organized in such a way that the computer can quickly search for a desired data item is known as :
► Retrieving
► Database
► Information
► DBMS

http://groups.google.com/group/vuZs

_____ is simply a fast port that lets you connect computer peripherals and consumer electronics to your computer without restart.

► Freeware
► Shareware
► Firewire
► Firmware

Structures, in which another list starts before the first list is finished, are called:

► Multiple Lists
► Nested Lists
► Ordered Lists
► Un-ordered Lists

The key property of the 'Array' object in JavaScript is

► Value
► Length
► Name
► All of the given choices

Which one is the example of spreadsheet software ?

► MS Word
► MS PowerPoint
► MS Excel
► MS Access

_____ is the process of analyzing large databases to identify patterns.

► Data normalization
► Data management
► Data Mining
► None of the given options

Which is the user-friendly way of presenting data ?

► Query
► Form
► Report
► All of the given options

JavaScript function fixed() has equivalent HTML tag-set ____

► <.FIX>.....</FIX>
► <F>.....</F>
► <PRE>.....</PRE>
► <H>.....</H>

<form> Tags always placed between the <BODY> and </BODY> tags of a Web page

► True
► False

Java script has ---------- ability to create and draw graphics.

► Limited
► Versatile
► Medium
► Not at all

Internet is an example of _____ network.

Private

Public

Both Private and Public

None of the given choices

The name of first commercially available PC was:

UNIVAC 1

ENIAC

EDVAC

Altair 8800

Algorithm is a _____

Definition of a problem

Sequence of steps to solve a problem

Understanding of a problem

Solving a problem

A group of information is called _____

File

Database

Record

Field

_____ is a branch of computer science concerned with manipulating and enhancing computer graphics.

Image Handling

Image Processing

Image Engineering

None of these

_____has changed our way of life like no other technology.

Computational technology

Computer technology

Computing technology

None of the Above

Sophisticated event handling is not possible with _____ event handling

Off-Line

In-Line

Out-Line

Non of the given choices

Babbage's Analytical Engine could store information permanently in:

Magnetic Tape

Floppy Disk

Punched Cards

None of the given choices

There are _____ popular schemes to reduce the number of bytes that are required for storing graphics.

4

3

2

None of these

The internet-society is considered under Surveillance because:

While surfing, we are being watched, constantly

Our every click is recorded and analyzed to extract patterns and behaviors

Webcams are becoming common. Providing a cheap way for parents to watch their children's every move

All of the given

URL is a/an _____

- ► Device
- ► Component

► Address

► Tool

To improve the time for scanning a web page, text should be _____.

► Centered

► Left Aligned

► Right Aligned

► Staggered

Communications on the internet is controlled by a set of two protocols which are _____.

► IMAP and SMTP

► FTP and HTTP

► TCP and IP

► TCP and HTTP

http://groups.google.com/group/vuZs

FTP stands for _____.

► File transmission protocol

► File transmission path

► File transfer protocol

► Fine transfer path

A named collection of properties (data, state) and methods (instruction, behavior) is called _____.

► Array

► Function

► Variable

► Object

Anchor tag denoted by <A> is used to create

► Address

► Hyperlink

► Paragraph

► Title

<UL> tag is used to

- ► underline text
- ► end the line
- ► create ordered list
- ► create unordered list

A user may access any item on the web through _____.

- ► URL
- ► Telnet
- ► POP
- ► SMTP

The browser breaks down the URL into _____ parts.

- ► 2
- ► 3
- ► 4
- ► 5

Which one of the following is NOT a primary color?

- ► Red
- ► Green
- ► Yellow
- ► Blue

According to a popular heuristic, success is defined by _____.

- ► The user
- ► The builder
- ► Both user and builder
- ► None of the given options

The idea of Neural Networks field is based upon _____.

- ► Human nature
- ► Human brain
- ► Human culture
- ► Human actions

ERP is a type of _____ .

- ► Entertainment software
- ► Productivity software
- ► Business software
- ► Scientific software

_____ are those programs in which the flow of the program is determined by the user's actions (mouse clicks, key presses) or messages from other programs.

- ► Event called programs
- ► Event processed programs
- ► Event driven programs
- ► Event declared programs

Automatic machines performing various tasks that were previously done by humans, are called _____.

- ► Robotics
- ► Computers
- ► Decision Making Systems
- ► Autonomous Web Agents

country=”Hello Pakistan”;

document.write(country.charAt(6));

The out put of the above statement is _____.

- ► o
- ► P
- ► a
- ► k

The distance among families is _____ because of spending more time on internet.

- ► Increased
- ► Expanded
- ► Contracted
- ► Decreased

The software used for the scanning of internet severs, is called _____.

- ► Wscan

► Mscan

► Sscan

► Vscan

Adding images to html page, we use_____ tag.

► <IMG>

► <IMAGE>

► <PICTURE>

► <PIC>

The group of technologies concerned with the capturing, processing and transmission of information in the digital electronic form is called _____.

► Telecom Engineering

► Computer Engineering

► Computer Science

► Information Technology

The responsibilities of the Team Lead includes_____.

- ► Planning and tracking of the project
- ► Detailed design
- ► Professional development of team members
- ► All of the given options

When the packets reach at destination, _____ reassembles them into original message.

- ► Protocol
- ► TCP
- ► IP
- ► NIC

Many developers write the _____ first and then incrementally convert each line into _____.

- ► Real code & Pseudo code

- ► Pseudo code & Real code
- ► Real code & Artificial code
- ► None of the given options

Machine language is also called

- ► Assembly Language
- ► Binary Language
- ► High Level Language
- ► HTML Language

In JavaScript, second element of an array has the index:

- ► 2
- ► 0
- ► 1
- ► 3

Each element in an array is given an index, which is an integer value between 0 and one less than the length of the array. The first element has an index of 0, the second element has an index of 1, and so on.

One can download or upload files to a remote computer using _____ protocol.

- ► HTTP
- ► SMTP
- ► FTP
- ► TELNET

JavaScript _____ support drawing of graphics

- ► Does
- ► Does not
- ► Always
- ► At times

Which of the following is NOT true about modern computers?

- ► More powerful
- ► Smaller in size
- ► Consume less energy

► Costly

Ada written a computer programme for ?

► Analytical Engine

► Difference Engine

► Harvard Mark 1

► Mechanical engine

A set of stand alone productivity applications designed to work together known as _____ .

► Productivity software suites

► Compiled software

► Secure software

► Intelligent software

Because of spending more time on the internet, the distances among the families have been _____.

Increased

Expanded

Contracted

Shortened

Sophisticated event handling is not possible with _____ event handling

Off-Line

In-Line

Out-Line

Non of the given choices

Autonomous Web Agents are also known as _____

Mobile Agents

Softbots

Both "Mobile Agents" & "Softbots"

None of these

A communication protocol is a _____that governs the flow of information over a network.

Set of Methods

Set of Protocols

Set of rules

None of the given choices

By default in a web page Hyper Link for another web page is represented as:

Blue only

Black and Underlined

Blue and Bold

Blue and Underlined

The organizations are learning that business can be done in a more effective manner if emphasis is placed upon _____.

Cooperation

Shared responsibility

Networking

All of the given

Monitor is an example of _____devices
Output

Input

Processing

None of the given choices

The code in the _____ portion is the right choice for developing larger JavaScript scripts

Body

At End

Head

Separate

_____ based on the principles of the logical reasoning ability of humans.

Genetic Algorithms

Rule-based Systems

Feed-Forward Network

None of these

The key benefit of VPNs over conventional PNs is:

Security

Efficiency

Lower Cost

Which of the following is incorrect for making design elements legible?

Select correct option:

Elements should be large enough
Elements must contrast sufficiently
Related elements should be visually grouped

Elements should have no visual focus

1. Function is also known as _____.

Select correct option:

subprogram
procedure
subroutine
All of given

In _____ TCP\IP protocols became the only set of protocols used on the ARPANET.

Select correct option:
1973

1983
1972
None of the given choices

http://groups.google.com/group/vuZs

E-mail system has _____ component(s)

Select correct option:
E-mail client
SMTP server
POP3 server

All of the given choices

_____ / / /_____/ A Parallelogram (Tilted rectangle) represents the _____ flow chart element.

Select correct option:
Process

Input or Output
Decision

Connector

If a computer could pass the Turing test then it would be able to:

Select correct option:

win a million dollar prize

think like human begins
think but slower than humans
do the things faster

Punched cards were replaced by:

Select correct option:

Floppy Disk
Zip Drives
Magnetic storage
None of the given choices

The _____virus may display an annoying, but harmless message

Select correct option:

Malicious

Neutral
Helpful
DoS

The name of very first computer was:

Select correct option:

ABC
BCD

EDC
None of the given choices

The internet communities are _____.

Select correct option:

Geographical based
Interest based
Country based
Religion based
_____% of the users have left websites in frustration due to poor navigation.
► 40
► 62
► 83
► 91

In JavaScript, a variable declaration is

► Optional
► Mandatory
► Not allowed
► None of the given

A protocol used for receiving email messages is called _____.

► URL
► Telnet
► POP3
► SMTP

which one is correct?

► onUnload

► onUnLoad

► onUNLOAD

► All of the above

Visit This Group:

Serial arrangement in which things follow logical order or a recurrent pattern, such as statements executing one by one, is called _____.

► Loop
► Sequence
► Condition
► Array

Variables allow us to manipulate data through the _____.

► Actual Value
► Reference
► Length
► Name

Fuzzy logic is based on _____.

► Ground facts

Word Processor is a _____

► System Software
► Application Software
► Device
► Utility

In the old days, databases did NOT support _____.

► Number
► Boolean
► Video
► Text

In tabular storage, fields placed in a particular row are strongly _____.

► Independent
► Dependent
► Interrelated
► Inconsistent

Due to working at home, lack of interaction may result in _____ professional growth.

► Slower
► Faster
► Higher
► Improved

Distance learning has got a boost due to the _____.
► Easy communication
► Online interactive contents
► Flexibility
► All of the given options

_____ technique can be used to create smooth animations or to display one of several images based on the requirement.

► Image downloading
► Image preloading
► Image uploading
► Image postloading

► Tree structured organizational model
► Network paradigm
► Hierarchical structure
► None of the given options

The group of technologies concerned with the capturing, processing and transmission of information in the digital electronic form is called

_____.

► Telecom Engineering
► Computer Engineering
► Computer Science
► Information Technology

A large number of networks interconnected physically is called _____

► LAN
► MAN
► Internet
► Network collection

TCP stands for _____.

► Transfer Center protocol
► Transmission Control Protocol
► Transmission Center Protocol
► Telephone Center Protocol

A collection of data organized in such a way that the computer can quickly search for a desired data item is known as :
► Retrieving
► Database
► Information
► DBMS

_____ is simply a fast port that lets you connect computer peripherals and consumer electronics to your computer without restart.

► Freeware
► Shareware
► Firewire
► Firmware

Structures, in which another list starts before the first list is finished, are called:

► Multiple Lists
► Nested Lists
► Ordered Lists
► Un-ordered Lists

The key property of the ‘Array’ object in JavaScript is

► Value
► Length
► Name
► All of the given choices

Which one is the example of spreadsheet software ?

► MS Word
► MS PowerPoint
► MS Excel
► MS Access

The Encryption of data is related to

► Data updates
► Data security
► Data integrity
► Data accessibility

_____ is the process of analyzing large databases to identify patterns.

► Data normalization
► Data management
► Data Mining
► None of the given options

Which is the user-friendly way of presenting data ?

► Query
► Form
► Report
► All of the given options

JavaScript function fixed() has equivalent HTML tag-set ____

► <.FIX>.....</FIX>
► <F>.....</F>
► <PRE>.....</PRE>
► <H>.....</H>

<form> Tags always placed between the <BODY> and </BODY> tags of a Web page

► True
► False

Java script has ---------- ability to create and draw graphics.

► Limited
► Versatile
► Medium
► Not at all

Private
Public
Both Private and Public
None of the given choices

Question # 2 of 10 (Start time: 05:21:53 PM) Total Marks: 1
The name of first commercially available PC was:
Select correct option:

UNIVAC 1
ENIAC
EDVAC
Altair 8800

Question # 3 of 10 (Start time: 05:22:43 PM) Total Marks: 1
Algorithm is a _____

Select correct option:

Definition of a problem
Sequence of steps to solve a problem
Understanding of a problem
Solving a problem

Question # 4 of 10 (Start time: 05:23:52 PM) Total Marks: 1
A group of information is called _____
Select correct option:

File
Database
Record
Field

Question # 5 of 10 (Start time: 05:24:17 PM) Total Marks: 1
_____ is a branch f computer science concerned with manipulating and enhancing computer graphics.
Select correct option:

Image Handling
Image Processing
Image Engineering
None of these

Question # 6 of 10 (Start time: 05:25:34 PM) Total Marks: 1
_____has changed our way of life like no other technology.
Select correct option:

Computational technology
Computer technology
Computing technology
None of the Above

Question # 7 of 10 (Start time: 05:26:27 PM) Total Marks: 1
Sophisticated event handling is not possible with _____ event handling
Select correct option:

Off-Line
In-Line
Out-Line
Non of the given choices

Question # 8 of 10 (Start time: 05:27:03 PM) Total Marks: 1
Babbage's Analytical Engine could store information permanently in:
Select correct option:

Magnetic Tape
Floppy Disk
Punched Cards
None of the given choices

Question # 9 of 10 (Start time: 05:28:30 PM) Total Marks: 1
There are _____ popular schemes to reduce the number of bytes that are required for storing graphics.
Select correct option:

4
3
2
None of these

A number of clever schemes have been invented to reduce the number of bytes that are required for storing graphics. 2 popular ones:
Color mapping
Dithering

Question # 10 of 10 (Start time: 05:30:01 PM) Total Marks: 1
The internet-society is considered under Surveillance because:
Select correct option:

While surfing, we are being watched, constantly
Our every click is recorded and analyzed to extract patterns and behaviors
Webcams are becoming common. Providing a cheap way for parents to watch their children's every move
All of the given

Which of the following is incorrect for making design elements legible?
Select correct option:
Elements should be large enough
Elements must contrast sufficiently
Related elements should be visually grouped
Elements should have no visual focus

25.10 Making Display Elements Legible:

1. Designing (arranging) Display Elements
Elements must be large enough to be processed visually

Elements must contrast sufficiently with their backgrounds
Related elements should be visually grouped through the use of space, color, or graphical boundaries
The relative levels of importance among elements in a display should be revealed graphically

Question # 2 of 10 (Start time: 05:03:37 PM) Total Marks: 1
1. Function is also known as _____.
Select correct option:
subprogram
procedure
subroutine
All of given

Function:
A group of statements that is put together (or defined) once and then can be used (by reference) repeatedly on a Web page Also known as subprogram, procedure, subroutine

In _____ TCP\IP protocols became the only set of protocols used on the ARPANET.
Select correct option:
1973
1983
1972
None of the given choices

E-mail system has _____ component(s)
1983 - The TCP/IP protocols becomes the only set of protocols used on the ARPANET
This sets a standard for all networks, and generates the use of the term Internet as the net of nets
ARPANET splits into two nets to keep military & non-military network sites separate: ARPANET and MILNET

Select correct option:
E-mail client
SMTP server
POP3 server
All of the given choices

_____ / / /_____/ A Parallelogram (Tilted rectangle) represents the _____ flow chart element.
Select correct option:
Process
Input or Output
Decision
Connector

Punched cards were replaced by:
Select correct option:
Floppy Disk
Zip Drives
Magnetic storage
None of the given choices

Ref:
http://en.wikipedia.org/wiki/Punched_card

During the 1960s, the punched card was gradually replaced as the primary means for data storage by magnetic tape, as better, more capable computers became available.

The _____virus may display an annoying, but harmless message
Select correct option:
Malicious
Neutral
Helpful
DoS

The internet communities are _____.
Select correct option:
Geographical based
Interest based
Country based
Religion based

Question # 1 of 10 (Start time: 04:51:32 PM) Total Marks: 1
Because of spending more time on the internet, the distances among the families have been _____.
Select correct option:
Increased
Expanded
Contracted
Shortened

Question # 3 of 10 (Start time: 04:53:30 PM) Total Marks: 1
Autonomous Web Agents are also known as _____
Select correct option:
Mobile Agents
Softbots
Both "Mobile Agents" & "Softbots"
None of these

A communication protocol is a _____that governs the flow of information over a network.
Select correct option:
Set of Methods
Set of Protocols
Set of rules
None of the given choices

Protocol
–Rules governing communications over the network

By default in a web page Hyper Link for another web page is represented as:

Select correct option:
Blue only
Black and Underlined
Blue and Bold
Blue and Underlined

The organizations are learning that business can be done in a more effective manner if emphasis is placed upon _____.
Select correct option:
Cooperation
Shared responsibility
Networking
All of the given

Question # 7 of 10 (Start time: 04:57:19 PM) Total Marks: 1
Monitor is an example of _____devices
Select correct option:
Output
Input
Processing
None of the given choices

The code in the _____ portion is the right choice for developing larger JavaScript scripts
Select correct option:
Body
At End
Head
Separate
_____ based on the principles of the logical reasoning ability of humans.
Select correct option:
Genetic Algorithms

Rule-based Systems
Feed-Forward Network
None of these

Rulebased Systems (1):
Based on the principles of the logical reasoning ability of humans

The key benefit of VPNs over conventional PNs is:
Select correct option:
Security
Efficiency
Lower Cost
None of the given choices
In _____ automatic machines perform various tasks that were previously performed by humans.
Select correct option:
Fuzzy Logic
Robotics
Rule based Systems
None of these

Remember us in your prayers
Mindhacker124@gmail.com
Hearthacker124@gmail.com

Avoid _____ to ensure readability of web page
Select correct option:

Overuse of bold and italics
Use of paragraphs
Use of white space
Use of contrast colors

Deep Blue was the name of:
Select correct option:

Human
Computer

City
None of the given choices

Using ____, a user can remotely log on to a computer (connected to the user through a network, e.g. Internet) & have control over it like a local user, including control over running various programs ?
Select correct option:

FTP
TCP
Telnet Protocol
None of the given choices

Telnet Protocol

Using Telnet, a user can remotely log on to a computer (connected to the user's through a TCP/IP network, e.g. Internet) & have control over it like a local user, including control over running various programs In contrast, FTP allows file operations only
Typical use: Configuring and testing of a remote Web server

DoS is_____ ?
Select correct option:

Crime
Cyber crime
Not a crime
A software

_____ enables users located at far-way locations to easily share information with others located all over the world.
Select correct option:

Protocol
Internet
Communication Channel
None of the given choices

Vacuum tubes were replaced by:
Select correct option:

Transistors
Electrodes

Electric Relays
None of the given choices

Cyber crime can be used to
Select correct option:

Damage a home computer
Bring down a business
Weaken the telecom, financial, or even defense-related systems of a country
All of the given

___ provides a simple, consistent way for applications to interact with the HW without having to know all the details of the HW

- ► Explorer.exe
- ► System Files
- ► Operating System
- ► Application Software

Communication protocol is a _____that governs the flow of information over a network

- ► Set of methods
- ► Set of protocols
- ► Set of rules
- ► Device

_____ team is responsible for the maintenance, expansion , improvement of the infrastructure consisting of workstations, networking equipment, software and network security.

- ► Support
- ► Configuration Management
- ► Quality Assurance
- ► Developer

_____ team consists on the sharpest technical minds in the company.

- ► Architecture
- ► Business Development
- ► Configuration Management
- ► Developer

_____ is responsible for day to day operations.

- ► CEO
- ► COO
- ► CMSO
- ► Developer

=**http://groups.google.com/group/vuZs**

Using Java Script you can write a character at random location on screen

- ► By applying randomCh() method
- ► With the help of String object
- ► With the help of random character property

► There is no built in approach in Java Script

The transistor is a solid state semiconductor device used for amplification and switching, and has _____ terminals.
► one
► two
► three
► four

Question No: 2 (Marks: 1) - Please choose one
Blue Pacific is a name of _____ computer.
► Mini
► Desktop
► Micro
► Super

Question No: 3 (Marks: 1) - Please choose one
Monte Carlo algorithm is an example of
► Randomized algorithm

► Greedy algorithm

► both greedy and randomized

► Heuristics

http://groups.google.com/group/vuZs

Question No: 4 (Marks: 1) - Please choose one
A set of stand alone productivity applications designed to work together known as __

► Productivity software suites

► Compiled software

► Secure software

► Intelligent software
