TESTING &MEASUREMENT PSY631

Psy631

1. To get a true representative sample, which of the following procedure one should keep in mind?

Sampling procedure

Population procedure

Independent procedure

Quae procedure

2. then two different independent observers give reliable estimates of the same test. the test is nown to ha

Split- Half Reliability

est-Retest Reliability

Internal Consistency Reliability

3. The sum of true score and error is known as:

Observed score

rue score

Measured Score

Sum sCofe

4. What is the mean of the stanine scale?

Three

Four

Five

Six

5. Which of the following is the function of the nom?

Comparative function

Logical function

Seasonal function

DR.UZAIR 03434055506

TESTING &MEASUREMENT PSY631

Diagnostic function

6. AS the sIze of sample increases, the chance of making error will

Reduce

Increase

Moderate

7. Which of the following format provides test takers an opportunity to ratify degree of their agreement to a statement concerning different phenomenon?

Category format

Likert format

Checklists

Q-sort format

8. Which of the following option can act as a possible source of variability in scores on a particular test?

Fatigue

Momentary distraction

Emotional Strain

All of the given options

9. The first draft of the test is then tried out on a group of sample test takers is known as

Test tryout

Test revision

Test counting

Item analysis

10. The first draft of the test is then tried out on a group of sample test takers is known as

Test tryout

Test revision

Test counting

DR.UZAIR 03434053506

TESTING &MEASUREMENT PSY631

Item analysis

11. In dichotomous format, probability of answering an item correctly by chance is:

1/2

1/3

1/4

1/5

12. Which of the following schedule was developed by Gesell to see the approximate developmental level that a child has achieved in months?

The Gesell Developmental Schedule

The Gesell Growing Schedule

The Gesell Progressive Schedule

The Gesell Age-related Schedule

13. Which of the following psychologist introduced the term MENTAL TEST?

Joseph M. Rice

Hermann Ebbinghaus

James McKeen Cattell

Karl Pearson

14. Don't you think that unsupervised media is not good for moral development of children? This statement an example of:

Double positive item

Double- barreled item

Double negative itemm

Double standard item

15. Item difficulty index is denoted by a lowercase italicized

a

P

DR.UZAIR 03434055506

TESTING &MEASUREMENT PSY631

Q

R

16. Unobservable presupposed traits that a test developer may invoke to describe test behavior or criterion performance is

Construct

Concept

Attitude

Content

17. Which of the following is a process of norm development?

Conceptualization

Standardization

Validity

Item analysis

18. Writing an essay is a type of which of the following format?

Likert format

Category format

Response format(not sure)

Checklists

19. Following are the possible factors that may cause error in measurement EXCEPT:

Test related factors

Test administration process

Examinee related variables

True scores of test

20. As the size of sample increases, the chance of making error will:

Reduce

DR.UZAIR 03434053506

Increase

Moderate

Rise

21. Ali was provided with a number of statements and he was asked to sort them in nine piles depending on to what extent they stand true of him. Which of the following format he was pursuing?

Checklists

Category format

Likert format

Q-Sort format

22. Which of the following scoring model refers to the comparison of a test taker's score on one scale within a test, with another scale within that same test?

Combined

Cumulative

Class

Ipsative

23. .....,.....validity may be used where prediction or inference are not involved:

Content

Face

Criterion related

Predictive

24. The general manner and behavior of the examiner, as 1llustrated by smiling, nodding, and making such comments as "good", or "fine" have----------on test results.

No effect

Decided effect

Mixed effect

DR.UZAIR 03434053506

Placebo effect

25. The general manner and behavior of the examiner, as 1llustrated by smiling, nodding, and making such comments as "good", or "fine" have ----------on test results.

No effect

Decided effect

Mixed effect

Placebo effect

26. Scholastic aptitude is an example of

Construct

Concept

Attitude

Content

27. Civil service testing program was first time developed by whom?

Chinese

Japanese

Americans

Germans

28. A relatively permanent way which distinguishes a person from the others is called:

Attitude

Trait

Aptitude

Temperament

29. Multiple choice questions are an example of Nominated-response format

Likert format

Selected-response format

DR.UZAIR 03434053506

TESTING &MEASUREMENT PSY631

Category format

30. Which of the following type of reliability is denoted by rtt?

Test-Retest

Split-Half

Alternate-Form

Kuder Richardson

31. There were 15 participants who filled a questionnaire of self-esteem. You added all their scores and then divide it by number of participants. You have calculated:

Mean

Median

Mode

Range

32. refers to the group of people whose performance data are used as a reference for evaluating individual test scores.

Normative sample

Purposive sample

Convenient sample

Individual sample

33. Which of the following is the most significant feature of domain referenced tests?

Content meaning

Clarity

Expressive

Easy to understand

34. Salman, a 15 years old boy, can perform only those tasks that a 6 years old boy can do. What will be his mental age?

15 years

DR.UZAIR 03434055506

6 years

10 years

7 years

35. Which of the following score expresses an individual's distance from the mean in terms of the standard deviation of the distribution?

Derived scores

Standard scores

Average scores

Mean scores

36. The process of setting rules for assigning numbers in measurement is called:

Counting

Scaling

Norms

Statistics

37. From the beginning up to the end, the examiner's mood variations might affect the result, is the disadvantage of:

Individual test

Army alpha test

Army beta test

Group test

38. Which of the following is the most significant feature of domain referenced tests?

Content meaning

Clarity

Expressive

Easy to understand

DR.UZAIR 03434053506

TESTING &MEASUREMENT PSY631

39. Which of the following score expresses an individual's distance from the mean in terms of the standard deviation of the distribution?

Derived scores

Standard scores

Average scores

Mean scores

40. Which of the following scoring model refers to the comparison of a test taker's score on one scale within a test, with another scale within that same test?

Combined

Cumulative

Class

Ipsative

41. Following are the possible factors that may cause error in measurement EXCEPT:

Test related factors

Test administration process

Examinee related variables(not sure)

True scores of test

42. An alternate solution to the problem of non-equivalence of tests and their comparability is to use:

National norms

Specific norms

National anchor norms

General norms

43. Extent to which a test measures what it is intended to

measure is called:

Reliability

Validity

DR.UZAIR 03434053506

TESTING &MEASUREMENT PSY631

Assessment

Testing

44. Item difficulty index is denoted by a lowercase italicized:

P

Q

R

45. Individual difference is an example of which of the following error factor of measurement?

Test related factors

Test administration process

Examinee related variables

True scores of test

46. In which of the following test the time limit is made so short that no one can finish all the items?

Speed

Power

Written

Projective

47. Which of the following is a characteristic of good examiner?

Empathetic

Uncertain

Apathetic

Altruistic

48. Validity coefficient is a value of:

Correlation

Standard deviation

Median

DR.UZAIR 03434055506

TESTING &MEASUREMENT PSY631

Mode

49. Standard deviation is an example of:

Raw scores

Measures of Dispersion

Inferential Statistic

Percentile Ranks

50. Which of the following validity is basic to the educational and occupational achievement tests?

Face

Content

Predictive

Criterion

51. Which of the following format provides test takers an opportunity to ratify degree of their agreement to a statement concerning different phenomenon?

Category format

Likert format

Checklists

Q-sort format

52. A----------test is the one that has normative data, as well as clearly specified administration and scoring procedures.

Standardized

Heterogeneous

Polarized

Normalized

53. MMPI is an examples of:

Diagnostic test

Intelligence test

DR.UZAIR 03434055506

TESTING &MEASUREMENT PSY631

Aptitude test

Bender gestalt test

54. Length of the test is an example of which of the following error factor of measurement?

Test administration process

Test related factors

Examinee related variables(not sure)

True scores of test

55. Psychology is the scientific study of:

Testing and mental processes

Assessment and testing

Behavior and mental processes

Behavior and testing

56. Standard error of measurement (SEM) is one way of expressing.

Reliability

Validity

Standardization

Norms

57. Which of the following type is not validity in the technical sense; nor is it technically measured?

Content

Face

Criterion related

Predictive

58. Test conceptualization is the, construction.

step in test

First

DR.UZAIR 03434053506

Second

Forth

Fifth

59. Percentage of people whose success or failure is accurately predicted by the test is measured by:

Base Rates

Hit Rates

Selected Rates

Fix Rates

60. Scholastic aptitude is an example of:

Construct

Concept

Attitude

Content

61. When two different independent observers give reliable estimates of the same test, the test is known to have

Split- Half Reliability

Test-Retest Reliability

Internal Consistency Reliability

Inter-Observer Reliability

62. If a test taker is using written tests particularly the objective ones, reliability is not a matter of concern.

Test-Retest

Inter scorer

Alternate-Form

Kuder Richardson

63. A test that describes what a person has learned to do is called:

DR.UZAIR 03434053506

TESTING &MEASUREMENT PSY631

Achievement test

Personality test

Intelligence test

Diagnostic test

64. In an MCQ question, the response options include one right answer and the others are called:

Stem

Distractors

Layout

Format

65. Scores that are directly obtained from subjects are:

Raw scores

Z-scores

Standardized scores

Divergent scores

66. American Civil Service Commission was established in:

1883

1783

1683

1983

67. When criterion- related validity is not the right choice for determining the validity of a test, a better option would be

to use.

validity.

Content

Construct

Face

DR UZAIR 03434053506

Concurrent

68. An organization develops its own norms by using the data of its employee. This is an example of:

Local norms

Sample norms

Personal norms

Organizational norms

69. Which of the following types of tests are commonly used in education?

Norm-referenced

Domain- referenced

Criterion-referenced

Diagnostic-referenced

70. identify the formula that is measuring observed score?

X= T+E

X= T+F

X= R+E

X= R+F

DR.UZAIR 03434053506
