How to do Project Selection? Let's Explore…. With VULMS Project Interface

For complete guidance with explanations, watch this video

(A complete guide of every page)

Project Selection

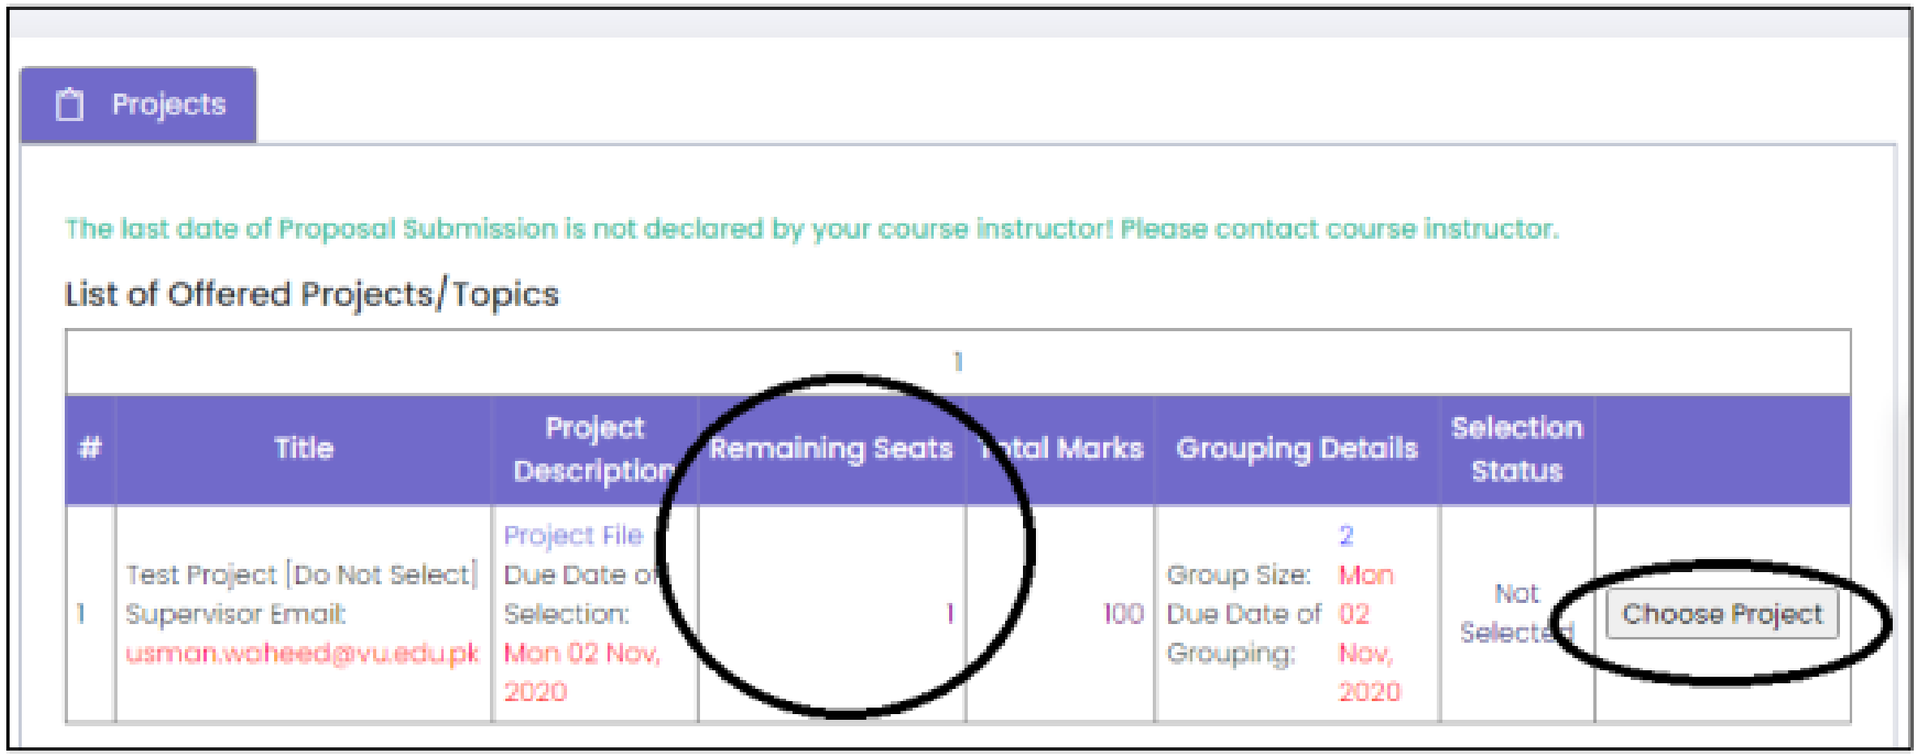

NOTE: It is recommended to use VULMS projects interface on a PC or Laptop instead of a mobile screen.

1) Project Selection

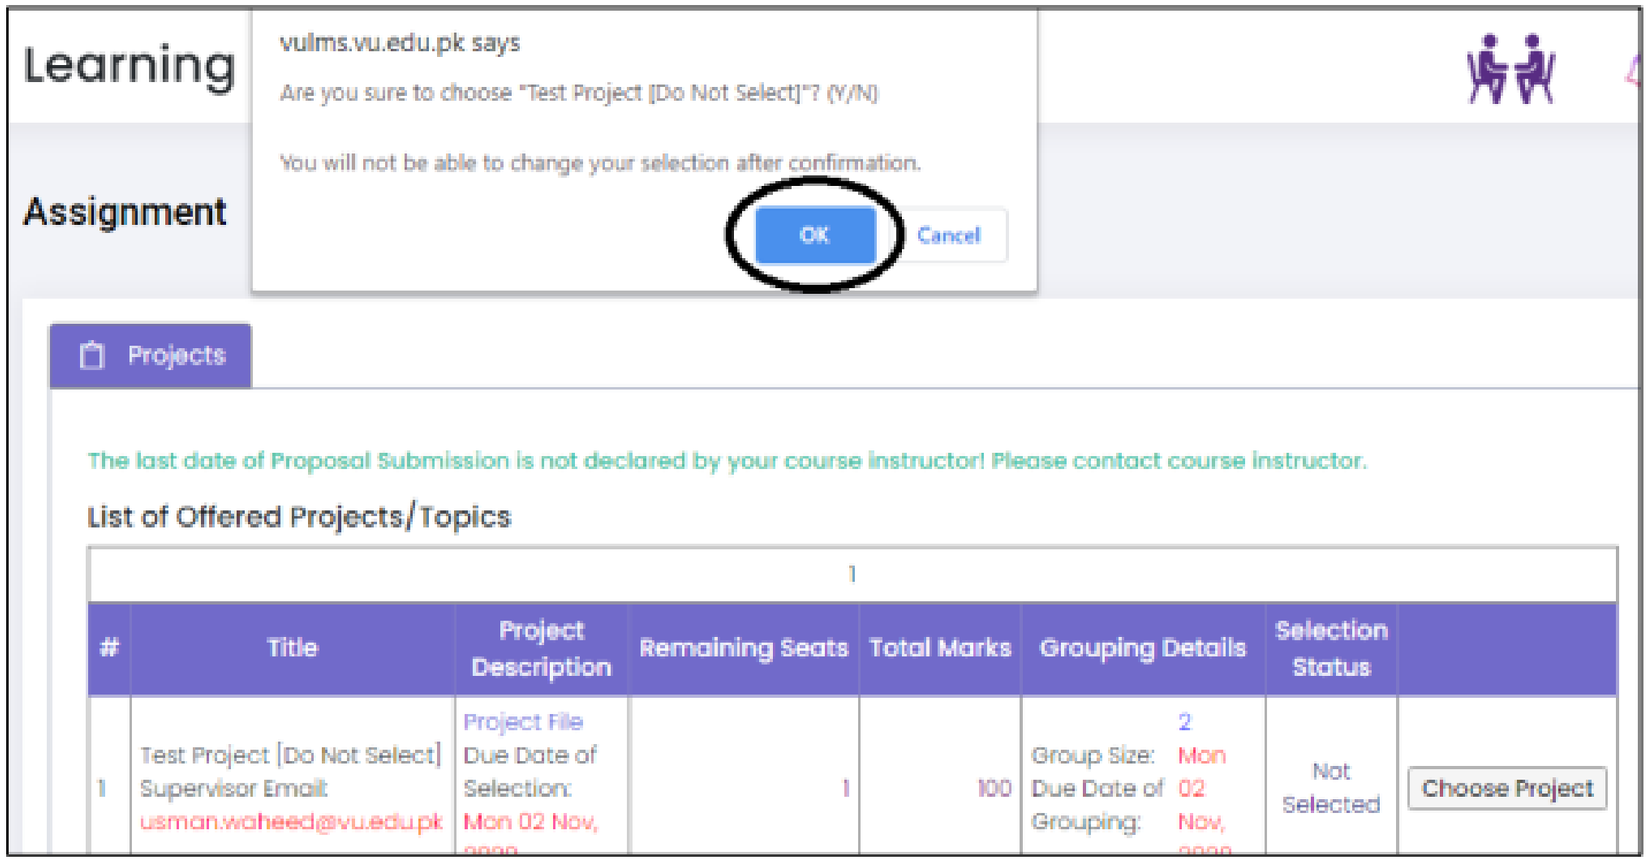

Click on Assignments link as shown below:

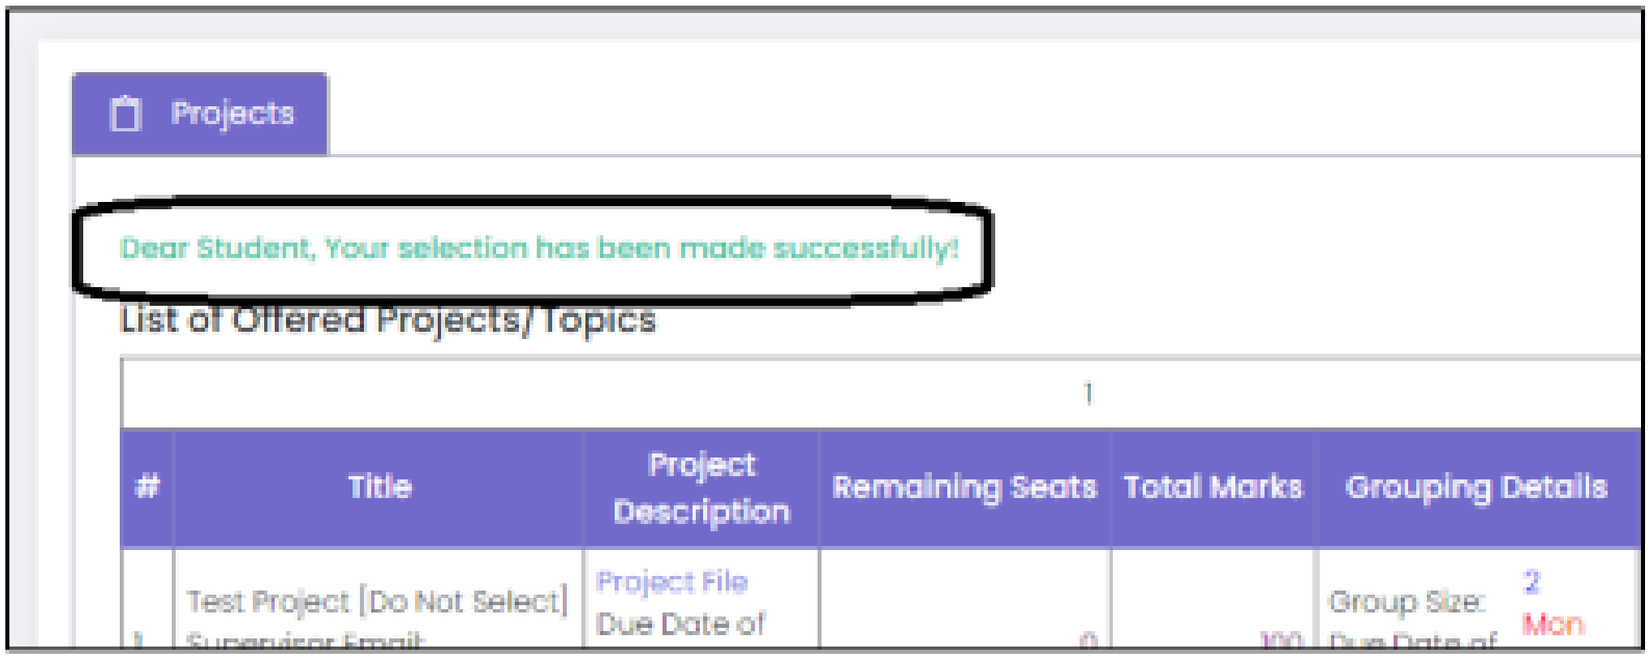

You will see list of projects as shown below along with how many seats are left in it. And you can select any project of your choice from the given list of projects (Choose Project button is indicated).

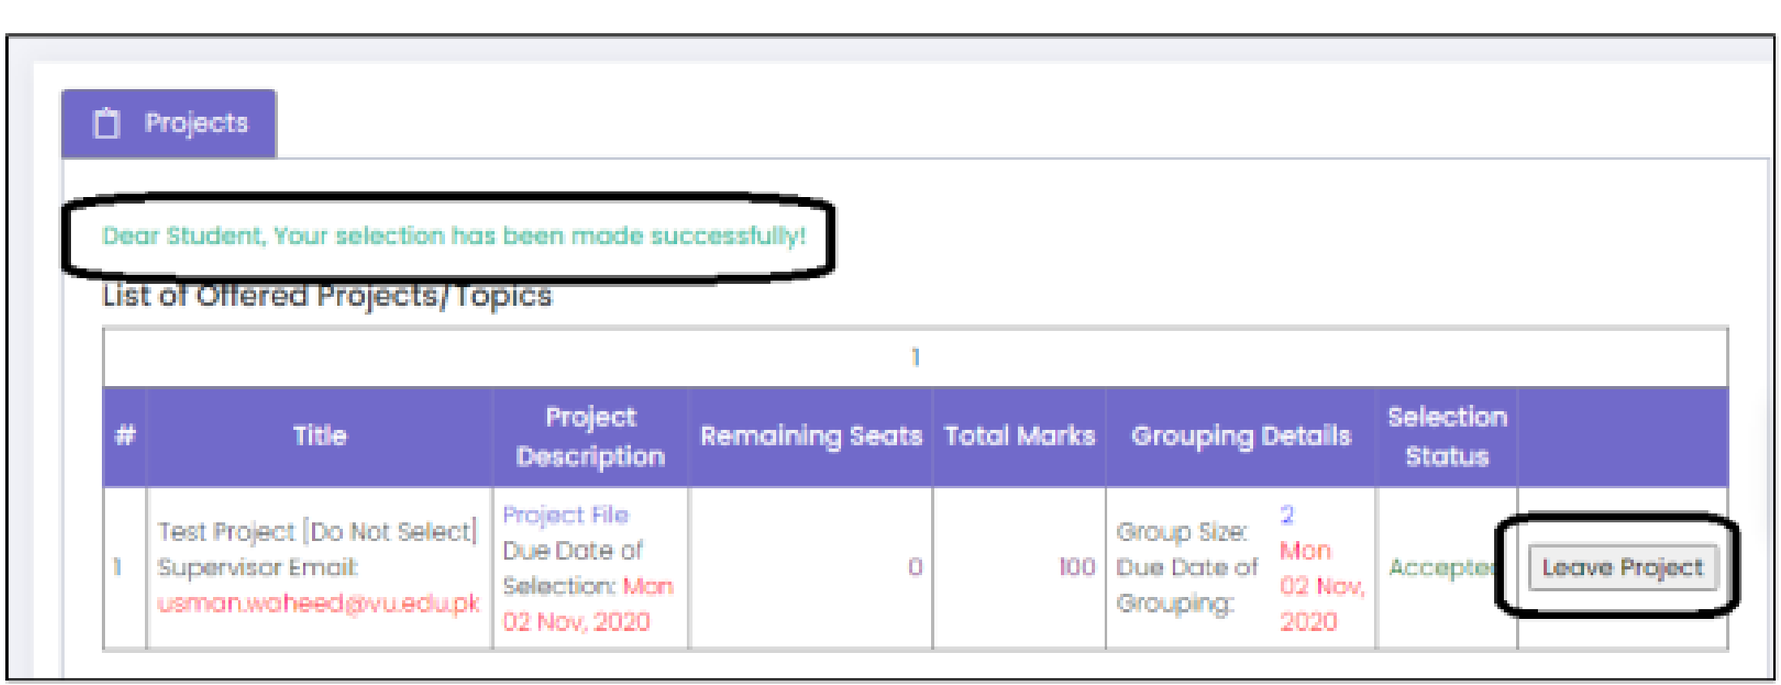

It will ask for confirmation, so you should click OK button

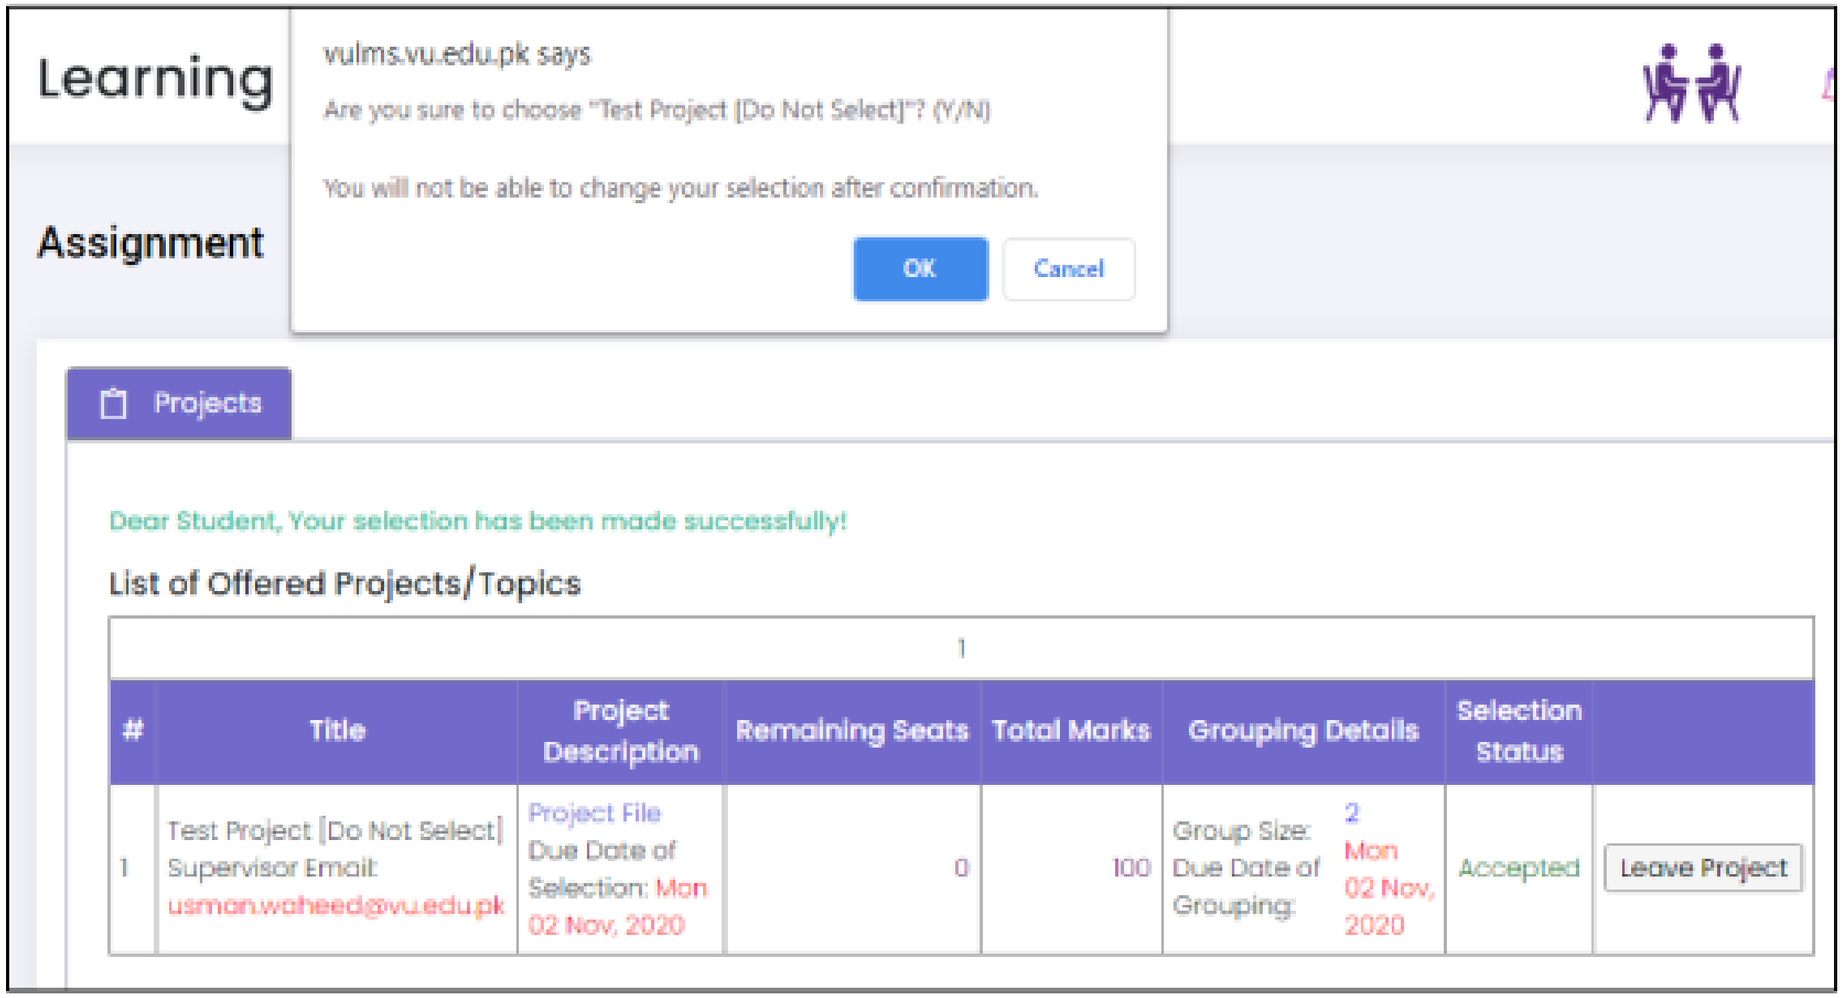

The interface will show a success message (indicated in following screenshot).

A student can leave a project in case the due date is available to select another project (provided the seats are available in that project and due date of project selection is not over). So, carefully decide before you leave a project. In case you want to leave the selected project, just click on Leave Project button, do the confirmation from confirmation dialogue and then VULMS will remove your project selection, so that you can select another project. The complete process is shown in following two screenshots:

.

MS Rehman

So here Project Selection is Complete.

Grouping

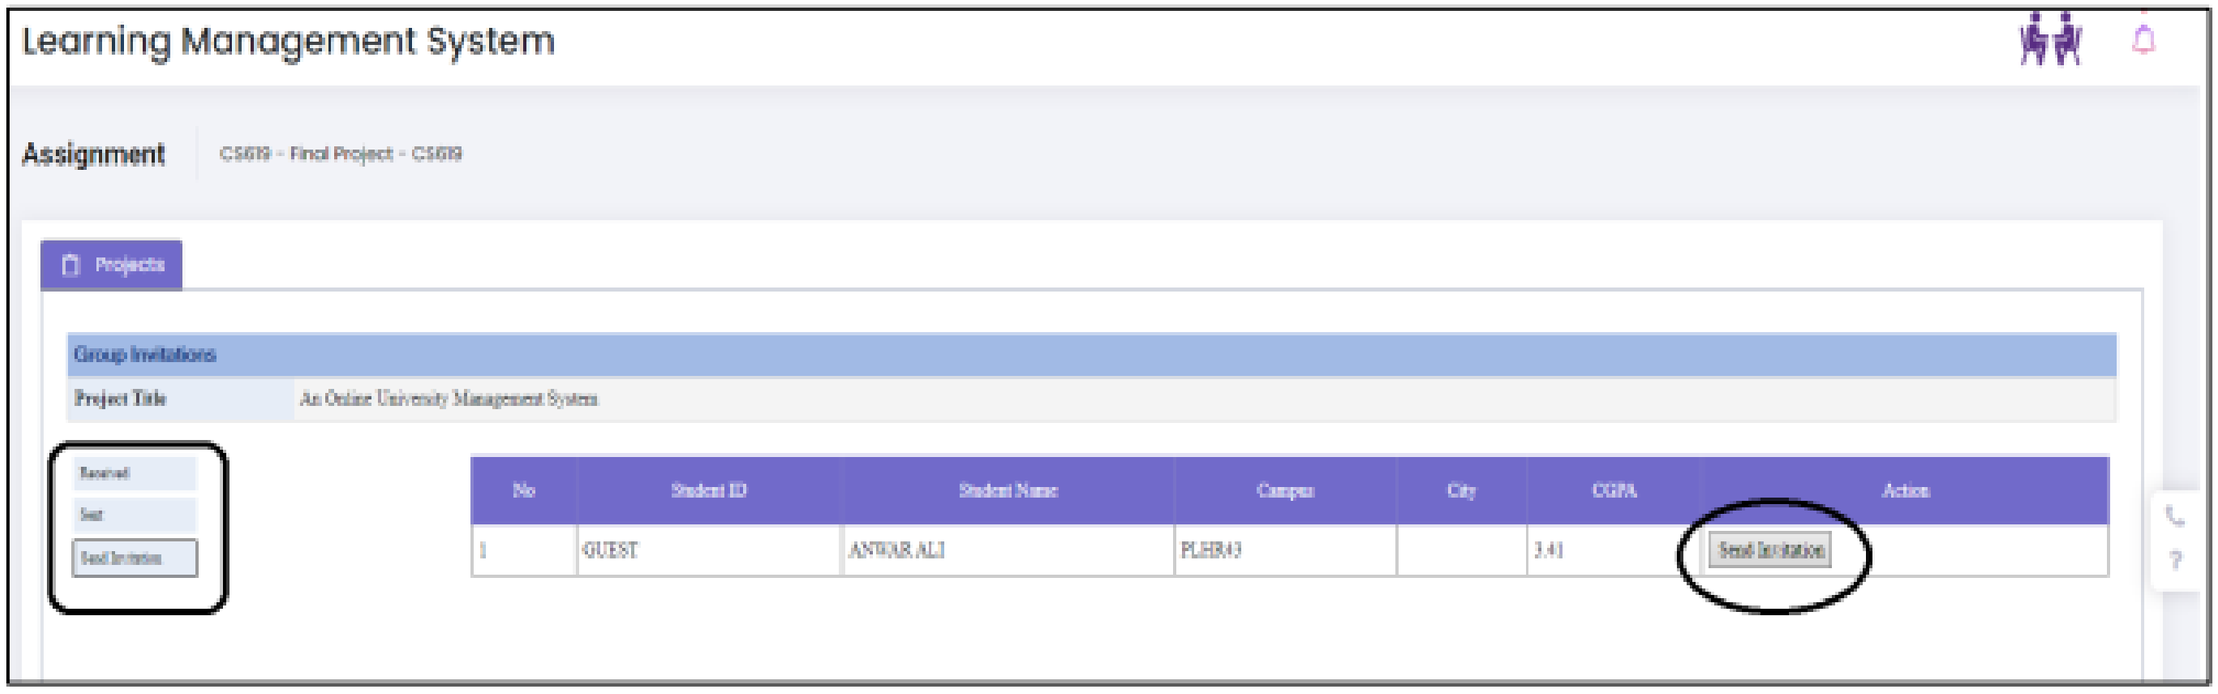

2) Grouping

Go back to CS619 course and click on Assignments again. Now you will see following interface where you can send group invitation to other students in the same project. All the students list will be displayed who are in the same project as you selected, and you can send invitation to anyone from the given list. But make sure you have contacted and discussed with your intended group member, before you come to this interface. So, that the request can be properly sent and accepted by the other student.

NOTE: Project Supervisor or CS619 cannot modify grouping of any project before the due date. As it is completely on students' end to use the interface to form group. In case you want to change your grouping, you can request your project supervisor after the due date of grouping.

The three screenshots below show how you can send a group invitation successfully.

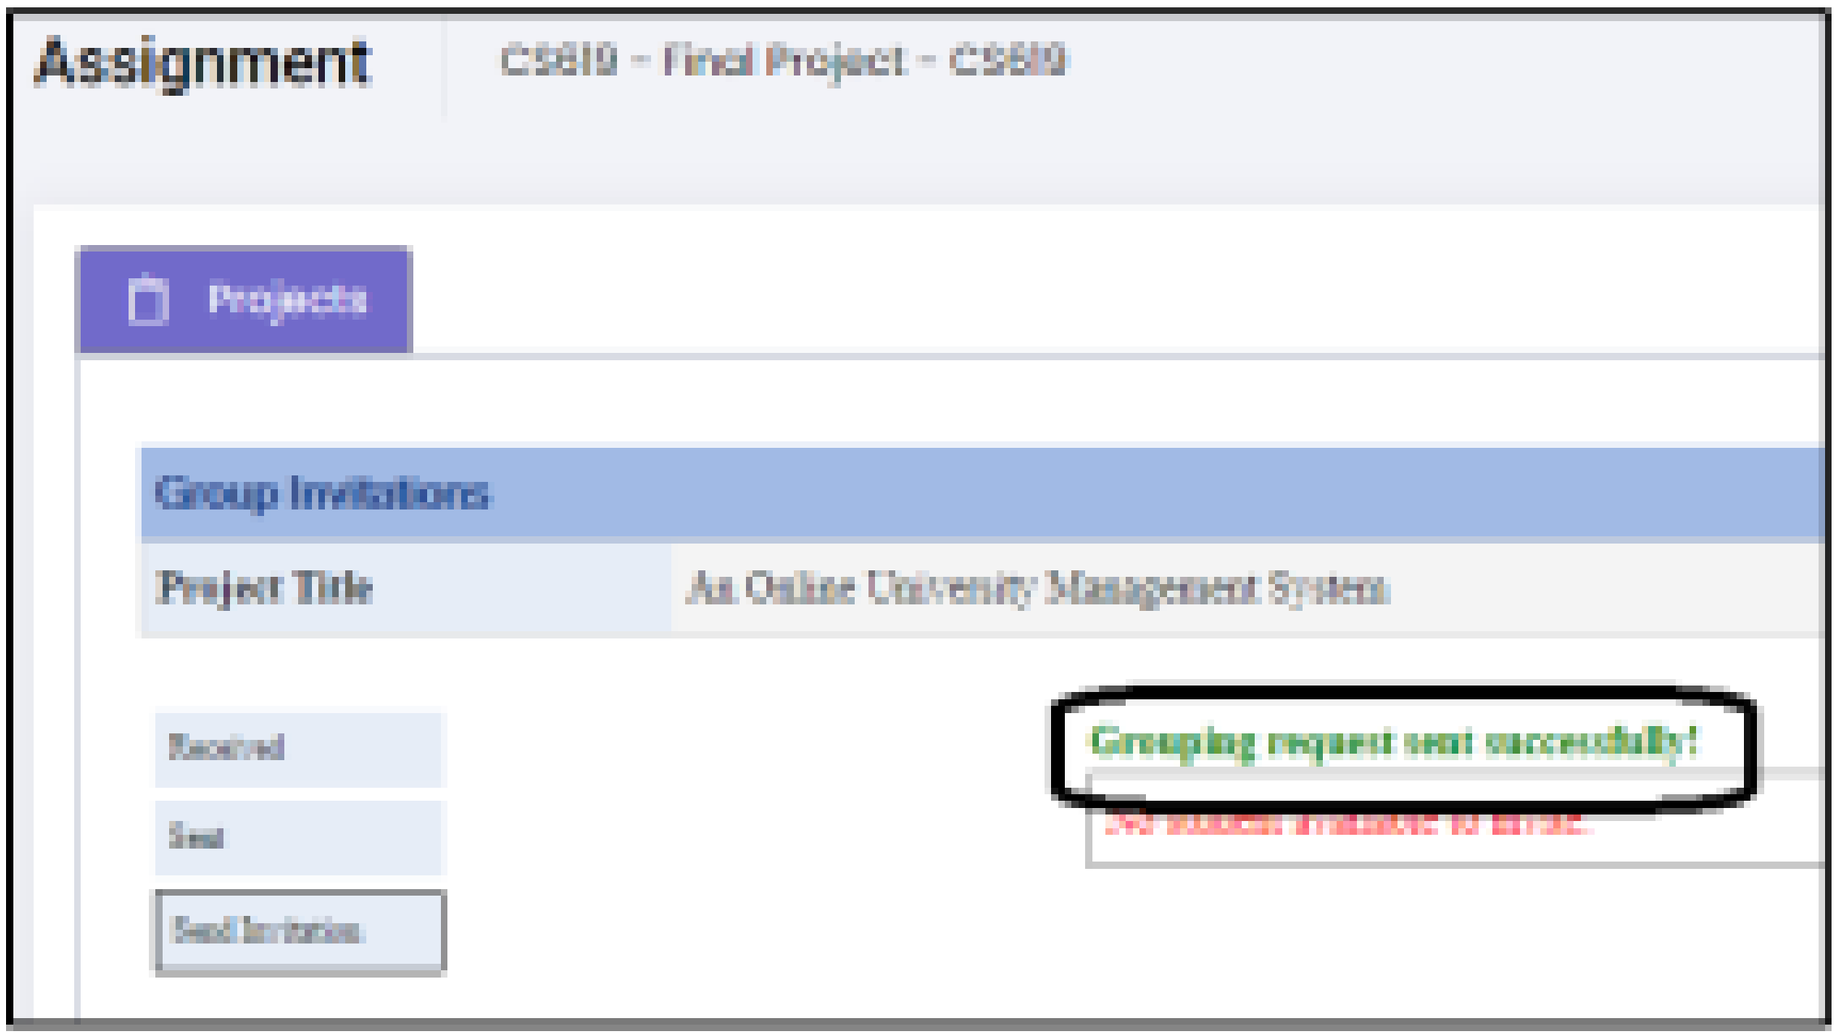

Screenshot 1:

Screenshot 2:

Screenshot 3:

So here your grouping is Complete.

Assalam-o-Alykum VU Students,

I'm MS Rehman, the person behind MS Creative Platform — trusted by thousands of VU students just like you. I hope you are all doing well.

When I started my journey at VU, I felt lost too…
No guidance. No proper help.
Just confusion — LMS, courses, activities, deadlines, and no one to ask.

That's why I created this platform. To make sure you never feel alone in your VU journey. And now I have the whole Team with me making it the BEST PLATFORM in VU.

Here's how I support you:

- Free Help — Stuck somewhere? Just text me. I'll guide you.
- Whatsapp Study Group— For every Subject and Program
- Top Whatsapp Channel — Updates of every VU notice
- Paid Services — LMS tasks and more
- VU Bookshop — Printed handouts (Used + New)

Whether it's your first semester or last, you have a small issue or a big one - I have the solution for you.
Text me anytime. Me and my team are here to help.

Warm regards,
MS Rehman (+92 306 4162784)
