Solution : .

It is clear in this Era of Technology and progress that Education plays a vital role in the progress and development of a country and nation. It wouldn't be wrong if we classify the education system as the cornerstone of the future progress of any nation.

As Pakistan is an underdeveloped country, Education is Extremely important for its Children and youngsters as well.

"Education is a matter of life and death for Pakistan. The world is progressing so rapidly that without requisite advance in education, not only shall we lag behind others but may be wiped out altogether."

-Quaid-e-Azam Muhammad Ali Jinnah

We are watching that standard of the education system in Pakistan is the worst of its kind and if it will not change, the Economy of Pakistan will go down daily and Pakistan cannot become a Fully developed nation until the System and structure of Education are improved or totally changed.

Today I am here with some suggestions for the Improvement in the current Education of Pakistan for a Better future because according to the Article of 25-A of the constitution of Pakistan:

The State shall provide free and compulsory education to all children of the age of five to sixteen years in such a manner as may be determined by law.

But as we see today in Pakistan that the condition of schools and colleges of Govt. sector is worst as compared to Private schools and colleges, This is mainly due to the syllabus and the method of teaching in both Govt. and Private sector.
